

Prima Belarina® Spring Sun Primrose Primula vulgaris 'Kerbelsun'

Plant Height: 6 inches

Flower Height: 8 inches

Spread: 12 inches

Spacing: 8 inches

Sunlight: 0

Hardiness Zone: 5a

Other Names: English Primrose

Group/Class: Prima Belarina Series

Description:

An outstanding selection from a refined series, with large, sunshine yellow double flowers; tidy, neat habit of dark green foliage; hardy and prefers sheltered shaded areas, and consistently moist soil

Ornamental Features

Prima Belarina Spring Sun Primrose features delicate clusters of yellow star-shaped flowers at the ends of the stems from early to late spring. Its crinkled oval leaves remain green in colour throughout the year.

Landscape Attributes

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. It is a good choice for attracting bees to your yard. It has no significant negative characteristics.

Prima Belarina Spring Sun Primrose is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Prima Belarina Spring Sun Primrose will grow to be only 6 inches tall at maturity extending to 8 inches tall with the flowers, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 8 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 5 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in partial shade to shade. It requires an evenly moist well-drained soil for optimal growth, but will die in standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in both summer and winter to conserve soil moisture and protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America.

Prima Belarina Spring Sun Primrose is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
